

Exhaust Assembling Paste

Bardahl Exhaust Assembling Paste initially serves as a lubricant that facilitates exhaust assembly. **Bardahl Exhaust Assembling Paste** is easy to use for gas sealing exhaust systems and exhaust pipes (fittings). The product hardens itself due to the hot exhaust gases.

It is effective in mounting all types of exhaust pipes and exhaust pieces.

Properties

- It is resistant to high temperatures after repair.
- It is resistant to corroding and vibrations.
- Provides durable protection against carbon monoxide gases.

Use

First, clean all parts from rust and grease. Take an amount of paste to close the hole and spread the paste with a small brush.

After sealing or assembling an exhaust section hardened by the hot exhaust gas and thus forms a long-lasting gas-tight exhaust.

Application

Drying – The exhaust heat does the curing of the paste during use. Shelf life (10 - 30 ° C) In originally sealed containers, stored undamaged, cool, and dry, the shelf life is at least 12 months. The containers must be protected from moisture and direct sunlight. Close used/ opened tubes airtight and use them up quickly.

Analysis data

Test	Results
SG	1.7 g / ml
Solid	65%
Viscosity	pasty
Color	grijs
Packaging	PE-Tube
