

## DOT 4 LV

**Bardahl DOT4 LV (low viscosity)** is a special brake fluid DOT4 with extremely low viscosity at cold temperatures.

The low viscosity of this DOT 4 LV makes it an ideal brake fluid for all modern vehicles with ABS and ESP. The noticeably shorter braking response time increases safety, especially at low temperatures.

**Bardahl DOT4 LV** is miscible with all other DOT4 and DOT 5.1 brake fluids, but the excellent low-temperature properties are negated.

Therefore, it is recommended to completely renew the brake fluid to take advantage of all the benefits.

### Specifications

---

- FMVSS No. 116DOT 4
- SAE J 1704
- ISO 4925 Class 6
- VW-Norm 501 14

### Meets

---

- BMW QV 34 001
- Ford WSS-M6C65-A2
- MB 331.0
- Toyota
- VW TL 766, Version Z
- GMW 3356

### Analysis data

Test	Unit	Results
Density 20°C	Kg/ltr	1.062
Viscosity -40°C	mm <sup>2</sup> /s	< 700
Viscosity 40°C	mm <sup>2</sup> /s	6,4
Boiling point	°C	>/ 265
Wet Boiling Point	°C	>/ 180
Flashpoint	°C	>/ 110
