

5 in 1 Cleaner for gasoline engines

Bardahl 5 in 1 cleaner for gasoline engines contains a concentrated formula with a unique package of multi-purpose additives that are the result of the very latest technology. This 5in1 Cleaner is a complete engine cleaning and can be used both preventively and curatively.

A professional solution for all engine parts that become clogged and contaminated by the combustion of fuel

Characteristics of use

Bardahl 5in1 Cleaner has the following properties:

- Restores the injection of the injectors.
- Cleans and protects the entire injection system (injectors and pumps).
- Cleans the **turbocharger**, the **EGR** valve, the **fuel particulate filter (GPF)**, the **exhaust valves** and the **catalytic converter** without the need for disassembly.
- Reduces fuel consumption.
- Increases the power and performance of the engine.
- Prevents the replacement of expensive parts.
- Reduces pollutant exhaust emissions and ensures good test results at the
- MOT.

This product is suitable for any petrol engine, both old and new.

Manual

Option 1:

Add to half a tank of fuel. Refuelling is not necessary for mixing.

Drive for 20 min. with a speed between 2500 and 3000 and then again until the fuel is almost empty. After that, refuel.

Option 2:

Drive until the fuel reserve warning light comes on.

Pour the contents of a bottle of 5in1 Cleaner into the tank and add about 20L of fuel.

Drive for 20 min. with a speed between 2500 and 3000 and then again until the fuel is almost empty. After that, refuel.
