

Clear Varnish (clear coat)

Bardahl Clear Varnish is a durable transparent lacquer layer on all types of lacquered metal surfaces, such as (light) metal rims. Provides long-term protection against rust and corrosion. On car rims, it also protects against burning of brake dust.

Manual

Remove rust and dirt from the parts to be treated. Cover the non-sprayable surface with paper. Shake the can of **Bardahl Clear Varnish** well. Spray at room temperature at a distance of 30-40cm. Spray in thin layers. After use, turn the can and spray until only gas escapes, this cleans the spray head. This spray can is filled with environmentally friendly gas.
