

Bardahl Classic Gear Oil SAE 140 is a 100% mineral single grade gear oil. The chosen viscosity, specially for classic cars, provides a constant lubrication under extreme loads.

Bardahl Classic Gear Oil SAE 140 contains a minimum of additives and is fully compatible with brass, bronze, copper and nonferrous metals. It is suitable for sealing materials of the time (paper, cork, felt and fabric). The excellent adhesion contributes to minimal wear, even after a long stand still period.

Applications

Suitable for gearboxes and final drives of classics that demand a single grade gearbox oil. Contains a friction reducer.

Specifications

API GL3
