

Leather Cream

Bardahl Leather Cream is a mixture of natural lanolin and waxes that protects your leather interior. You nourish the leather so that it remains supple and soft and retains shine. In addition, dirt is easily removed by the protective layer. Because the leather is soft, the chance of hairline cracks and/or cracks in the paint layer is reduced.

Manual

Make sure that the upholstery is clean first and wipe it off with a damp cloth. Shake the bottle well before using the product. Apply the Leather cream with a dry cloth and leave it on for 30 seconds. Rub out with a soft dry cloth. Use Leather Cream regularly to keep your leather in excellent condition. Do not use on suede.
