

Common Rail Diesel Injector Cleaner

Bardahl Common Rail Diesel Injector Cleaner is a concentrated formula that has been primarily for raising problems such as; sticking to accelerating, irregularly stationary running of the engine, problems at a cold start, high fuel consumption, and exhaust smoke, which is the consequence of pollution of the fuel system of both old and new diesel engines. (HDI - CDI - TDI - TDCI - DCI -, ETC.....)

The working

Bardahl Common Rail Diesel Injector Cleaner contains a unique formulation that cleans and maintains the sprays without dismantling them. One treatment already ensures the following improvements:

- Cleaning and protecting the complete injection system (injectors, flaps, pump, piping, etc.....)
- Raise the Cetane number of diesel oil and increases the acceleration.
- Prevents malfunction of the injectors and the pump by removing water from the fuel.
- Reduces the fuel consumption thanks to the anti-wear properties.
- Reduce the noise of the engine thanks to the lubricating properties.
- Reduces the exhaust smoke and simplifies the adjustment of the engine under emission demands.
