

Grey Primer (Spray)

Bardahl Primer is a high-quality primer for all types of paint. This primer can be sanded wet or dry and ensures better adhesion of the paint.

After spraying, a hard, well-covering base forms that offers good resistance to rust. The high quality of the paint makes this product excellent for clear metals.

This primer forms a good barrier against corrosion of bare metal parts. Due to the thickness of the lacquer layer, small imperfections are covered. It can also be used as an adhesive substrate for wooden parts.

Bardahl Primer can be sanded if several coats of lacquer need to be applied. In this way, a beautiful, smooth surface can be created.

Product features

- For indoors and outdoors
- Quick drying
- Long service life
- Anti-corrosion

Manual

Remove rust and dirt from the parts to be treated. Cover the non-sprayable surface with paper. Shake the bus well. Spray at room temperature at a distance of 30-40cm. Spray in thin layers. After use, turn the can and spray until only gas escapes, this cleans the spray head. This spray can is filled with environmentally friendly gas.

Warning

Holder under pressure. Protect from the sun and do not expose to a temperature higher than 50C°. Do not pierce or burn even after use. Do not spray in the direction of a flame or glowing object. Keep out of reach of children.
